Wholesale Price List

FALL 1926

F. & F. NURSERIES
Springfield, N. J.

Princeton, N. J.

Aug. 1st, 1926

Dear Friends:

We are glad of the opportunity to send you this, our 13th fall catalogue and to be able to say the stock offered is of our regular high quality, in fact if anything a little better, as we try hard to make improvements each year.

As our list is increasing each year and now embraces a number of items that are evergreens in the south and practically deciduous in the north, so that it is difficult to know where to put them in the list, we have listed them twice both as deciduous and evergreen.

There is much confusion often in trying to separate the trees from the shrubs when we take the class of small trees or large shrubs, we so have put them all in one list alphabetically with figures of approximate sizes the plant reaches at maturity and a brief description of its outstanding characteristics.

We have also added an appendix with classified lists of plants for various purposes, which we believe will help our customers in making up their lists.

We look forward with pleasure to supplying your requirements this fall and invite you to visit us at any time. If you are too far away to come by auto, take the Pennsylvania Railroad to Princeton Junction where we will meet you by appointment or when notified by phone.

Fall prospects are good as stock seems to be in demand and our Princeton Products are established as the "Standard of Excellence" in Ornamentals.

Yours very truly,

PRINCETON NURSERIES,

WILLIAM FLEMER, Jr.,

Manager

Office and grounds, Princeton Nurseries.

Members: American Association of Nurserymen.

Eastern Nurserymen's Association.

New Jersey Nurserymen's Association.

Quotations, prices, and grading are based on HORTICULTURAL STANDARDS adopted by the American Association of Nurserymen, June 1923.

PRICES

Prices are as low as is consistent with the market, taking into consideration that the stock offered is of the best quality, carefully grown, with ample room for full development. Princeton grown stock should not be compared with poorly grown plants often offered. Prices are for Fall 1926.

CREDIT AND TERMS

We are glad to extend credit on the basis of our regular terms to established nurserymen who are known to us, or are rated satisfactorily. Cash before shipment is required from parties unknown to us, who have no commercial rating.

Terms, 2% 10 days, 1% 30 days from date of invoice. Interest at 6% will be charged on overdue accounts, Spring accounts from July 1st, Fall accounts from Jan. 1st.

Packing house and storage cellar, Princeton Nurseries. They are on our own siding which insures the minimum of exposure when loading and facilitates rapid shipment. We specialize in carload orders for which no charge is made for packing.

LIABILITY AND CLAIMS

We are not liable for injury to stock from frost, hail, fire, or other causes beyond our control, and book all orders with this understanding. Errors made by us will be gladly corrected, but complaints must be made within ten days time after receipt of stock.

Plants become your property upon delivery to transportation company, and we cannot be responsible for loss, damage, or delay in transit.

After the botanical name, in the following pages, we have embodied a new feature of giving the approximate height the plant attains at maturity; and a short description, giving the chief quality or characteristic of the plant, feeling that it would be a help to you in making up your order.

Princeton Nurseries employ no agents.

All stock offered herein is grown on our own nurseries under our own direct supervision.

PACKING

Bales and Boxes charged at cost. No packing charge is made for stock packed in full carlots. Boxes are made in the following sizes:

31 in. x 36 in.—10 ft. long	\$5.25
28 in. x 32 in.—10 ft. long	4.75
23 in. x 28 in.—10 ft. long	4.25
19 in. x 24 in.—10 ft. long	3.75
17 in. x 20 in.—10 ft. long	3.25
15 in. x 16 in.—10 ft. long	2.75
12 in. x 15 in.—10 ft. long	2.00

Add 50 cents for each additional 2 feet of length.

Decreases are in the same proportion, 50 cents for each 2 feet.

Deciduous Trees, Shrubs, Evergreens and Vines

NOTE—The figures in italics, following each variety, indicate in feet the approximate height of that plant when mature. It must be understood, however, that many varieties in their native habitat greatly exceed this height, but soil and climatic conditions modify their growth and character to a variable extent, and allowance for this has been made in the heights given here.

FRENCH LILACS—NAMED VARIETIES

These are all grown from cuttings and are on their own roots, which is the best way Lilacs can be grown, as they will not sucker. It is the most expensive way to grow them, but our prices compare favorably with the cheap, grafted stock. These named Lilacs generally grow from 6'-12' in height, depending on the variety and locality.

Two year Apples, grown at Princeton. Our fruit trees are clean, fully up to size, and true to name. We do not grow immense quantities of fruits, but have enough to supply the needs of customers who want a medium quantity to go in an assortment order. By growing them ourselves, we can stand back of them and know that we are delivering the right kind of stock.
